

LOCAL COMMUNITY POLICY

We will support and work with local people and communities. We will mind the local people and consider their needs during our business. Wherever possible we will provide employment to local people; therewithal will not make any religious, racial, language or ethnic discrimination and will respect the culture, traditions and customs of local people and communities.

By accepting the focal point of the guests, it will be possible to examine their wishes, expectations and needs and ensure that appropriate services are planned and given to them,

The quality and reliability of our products are under the TSE brand and in the Food Codex using appropriate raw materials,

Working with primarily locally-active companies, companies and suppliers who have the same quality philosophy as ours, along with our slogan titled "Close to perfection" in the framework of our sourcing strategy

We only feel responsible for our employees and our customers, especially our suppliers and the public. The relationships we have with our suppliers are goal-oriented, reliable and continuous.
