OUR ENVIRONMENT POLICY

Our organization, which constitutes an important place in the region, is in line with national and international legislation and standards under the leadership of top management, provide guest's expectations and needs, our main principle is to provide quality service.

When we carry out our service processes, the principles of protecting natural resources, using the least harmful technologies to the environment, reducing the amount of raw materials and reducing the amount of waste are taken as basis.

We prefer suppliers who use renewable energy sources and evaluate their wastes and contribute to energy conversion to create value added to the companies that work with recycling and reuse methods and provide energy savings.

To ensure that all legal requirements regarding environmental dimensions are taken into account, taking into account the environmental impacts of all our processes, To continuously inform our guests, suppliers and employees in order to improve environmental awareness and environmental impact, Environmentally friendly facility to instill awareness of our staff, Analyzing the emergency risks that may occur in the facility and taking precautions, Being environmentally conscious for a healthy and livable world.

It stems from the respect we have for our country and the environment. Protection of the natural environment for the survival of the elements that make the holiday a special experience to make a difference in our responsible tourism practices and we invite you to support us.
