

## KAMELYA COLLECTION

EXCLUSIVE HOTELS

### PURCHASING POLICY

We aim to ensure the quality and reliability of our products by using TSE-branded and Food Codex-compliant raw materials by accepting the guests as the focal point, investigating their requests, expectations and needs, planning and providing appropriate services.

Within the framework of our purchasing strategy and with our slogan "Closer to perfection", we work with companies, firms and suppliers operating primarily locally who have the same quality philosophy as us.

We feel responsible not only to our employees and customers, but especially to our suppliers and the public. Our relations with our suppliers are goal-orientated, reliable and continuous.

In order to protect the environment and support regional development; we prefer products with sustainable certificates in our purchasing processes, we take into account the methods of growth or origin of production in suppliers without certificates.

We plan purchasing activities to minimise plastic and paper product purchases, and we take care to make efficient purchases made from eco and recyclable materials.

We evaluate alternatives to minimise chemical consumption. We attach importance to local co-operation and prefer suppliers with close transport proximity by evaluating their advantages.

We aim to cooperate with local entrepreneurs as much as possible. We do not purchase threatened species and comply with hunting bans.
