ENERGY MANAGEMENT POLICY

In all our activities; we aim to set measurable goals that will increase energy efficiency, to monitor the goals periodically and to continuously improve energy performance. We provide the necessary information and resources to achieve our determined goals and objectives. We emphasise the use of sustainable and renewable energy sources.

With our Energy Management Policy, we are committed to raise awareness through trainings and information in order to fulfil our responsibilities towards the society, environment and legal processes by covering all our stakeholders including our guests, suppliers, employees and local environment.
